

PULP & PAPER

1984 EDITORIAL INDEX

The 1984 Editorial Index contains complete listings of all feature articles and news stories published in 1984 issues of *Pulp & Paper*. Feature articles are listed by subject, by author, and by company. Feature articles and news stories covering activities outside North America are listed under the name of the country. News stories are listed in the news stories section and also by company.
(Note: BG = Buyers Guide, November 15 issue.)

INDEX OF FEATURE SUBJECTS

This index includes both feature stories and news items.

CHEMICALS

Chemical Markets Column:

Chlorine	Jan 197
Caustic soda	Apr 235
Aluminum sulfate	May 205
Sodium hydrosulfite	Jul 205
Sodium sulfate	Aug 187
Sodium carbonate	Sep 315
Hydrogen peroxide	Oct 219
Chemicals directory: names of major suppliers	BG 155
Chemical survey forecasts good availability	Nov 77
Chlorine dioxide key to reducing bleaching costs	Nov 64
Slime control: current cost-effective practices	Jun 113
TiO ₂ pigment supply tightening worldwide	Aug 106

COATING/SIZING

Coatings, filler pigments survey	May 56
Mead ups coated paper capacity at Escanaba, Mich.	May 78
Midtec uses continuous starch cooker for adhesives	Dec 73
Short dwell coaters reduce losses, downtime	May 102
Surface treatment of groundwood printing papers	May 62
Thames Board adds new coated boxboard machine	May 138

DIRECTORIES/LISTINGS

Chemicals: names of major suppliers	BG 155
Equipment and supplies	BG 59
Manufacturers and suppliers	BG 274
Market pulp—grades, producers, trade names	BG 225
New Product Showcase	BG 26
Replacing equipment: guide to manufacturers	BG 17
Technical and consulting services directory	BG 195
Top Product Review	BG 37

ENGINEERING/MAINTENANCE

PAPERMAKING/BOARDMAKING

Grade Profile

Linerboard Jan 13
Tissue Feb 13
Coated free-sheet papers Mar 13
Uncoated printing/writing papers Apr 13
Coated groundwood papers May 13
Corrugating medium Jun 13
Recycled paperboard Jul 13
Bleached paperboard Aug 13
Uncoated groundwood papers Sep 13
Paper-grade chemical market pulp Oct 13
Unbleached kraft paper Nov 13
Newsprint Dec 13
Automatic control of differential pressure Mar 138
Bowater Southern starts up twin-wire conversion Feb 91
Cleaners: large vs small hydrocyclones Dec 109
Containerboard changes/multifouling wet ends Nov 120
Dandy roll use regaining popularity Aug 126
Dryer drives use felt rolls, operate at 3,000 fpm Aug 74
Dryer fabric technology: recent developments Feb 126
Dyeing pulp in alkaline system requires forethought Sep 184
Forming fabric design continues to evolve Oct 122
Headbox slice profile control system (remote) Apr 80
Liquid ring pumps vs centrifugal exhauster units Apr 84
Modern press felts—product of changing technology Jun 138
Moisture profile control improves paperboard Apr 100
Older paper machines can be energy efficient Apr 122
Paper machine clothing selection, installation Apr 55
Paper machine rebuilds gaining popularity Sep 228
Roll covers for modern press sections May 84
Slime control: cost-effective practices Jun 113
Starch enzyme conversion reduces costs Jan 131
Stock preparation equipment: guide to manufacturers BG 17
Surface treatment of groundwood printing papers May 62
Swedish mill obtains high water removal with press Sep 182
Top wire units: options for grade, weight, speed Jul 114
Vacuum system improves press section performance Jul 79
Whitewater systems for low freshwater consumption Dec 62

POWER/ENERGY

Augusta Newsprint adds new power boiler Jun 116
Austell Box Board installs new coal-fired boiler Jun 135
Control system improves recovery boiler efficiency Mar 93
Difficulties hamper peat fuel use Feb 132
Energy management cuts Glatfelter's costs by 3.5% Jun 92
Energy management system online at Finnish mill Jul 93
Heat recovery methods boost TMP/CTMP efficiency Jun 53
Lime kiln uses woodwaste to cut fuel costs in half Nov 140
Publishers adds new TMP heat recovery system Mar 78
Energy: older linerboard/newsprint machines Apr 122
Steam turbine design: new approaches Jun 60

PROCESS AUTOMATION

Automation improves recovery boiler efficiency Mar 93
Automated roll tracking at MacMillan Bloedel mill May 99
Automatic stencil cutters speed roll handling May 122

Chesapeake adds computerized roll handling system Mar 62
CZ expands profile automation system Feb 74
Digital controller features self-correcting database Jun 99
Finnish mills benefit from recovery boiler control May 95
Global energy management online at Finnish mill Jul 93
PLC interface aids woodyard troubleshooting Feb 64
ITT Rayonier has success with distributed control Mar 96
Lime kiln optimization uses "glass box" control Apr 99
Millwide control proves practical for Finnish mill Sep 205
Millwide control improves Norwegian mill Aug 93
Millwide system integrates all levels of control Jan 103
Modernization at Finnish mill: millwide control Sep 210
Moisture profile control improves paperboard Apr 100
Online color measurement provides accuracy Jan 107
Personal computer system proves cost-effective Jan 105
Pitch box with removable stainless steel plates Jul 91
Probe colorimeter protects against liquor leaks Jun 100
Profile control system cuts sheet weight variations Feb 68
Programmable controller optimizes tie line control Oct 126
PC replaces relays in chip handling Feb 62
PC survey compares top systems Feb 54
Remote control used for headbox slice profile Apr 80
St. Regis adds 17 PLCs at Bucksport, Maine Feb 59
Special report on PLCs Feb 53

PULPING

Alkaline extraction is workhorse of bleach plant Oct 102
Bleached chemimechanical pulp use to increase May 115
Chemimechanical pulp from aspen shows promise Sep 230
Chlorine dioxide key to reducing bleaching costs Nov 64
Coaxial chip feeders aid steam recovery from TMP Jun 96
CL₂ mixer installed at Weyerhaeuser mill Jun 119
Directly connected pulp screening: Part 1 Jun 78
Directly connected pulp screening: Part 2 Jul 59
Heat recovery methods boost TMP/CTMP efficiency Jun 53
High-consistency screening cuts equipment costs Mar 80
High-consistency slushing cuts contaminants Mar 58
Horizontal tube reactors solve pulping problems Feb 105
Lime kiln uses woodwaste to cut fuel costs in half Nov 140
Modified pulping process shows promise in Finland Nov 124
Optimization of pulp mill: focus on energy, labor Nov 98
Oxidative extraction process still has hazards Aug 71
Oxidative extraction cuts hypochlorite consumption Oct 118
PGW benefits LWC paper production at Finnish mill Jun 73
Recovery boiler treatment controls slugging Nov 57
Static mixer successful in E₀ bleach stage Oct 140
Acceptance of new bleaching technology Oct 56
Swedish mill eliminates two stages in bleaching line Jul 136
TMP heat recovery online at Publishers Paper May 78
Turpentine recovery at St. Regis, Pensacola Nov 144

RAW MATERIALS/PULPWOOD/FORESTRY

Augusta Newsprint adds new woodyard Jul 119
Canadian forests need action (Industry Comment) Feb 204
Chip quality has major impact on mill cost efficiency Jul 54
Chip thickness screening applications for mills Jul 76
Owens-Illinois upgrades Valdosta, Ga., woodyard Jul 98
Pulpwood slashing unnecessary step in woodyard? Jul 133
Single-rod dischargers for wood handling Jul 112

RECYCLING

Chemicals offset strength loss in secondary fibers Mar 73
High-consistency slushing cuts contaminants Mar 58
Ontario Paper adds 250-tpd deinking system Mar 55
Stickies detection simplifies equipment selection Mar 113
Wastepaper fiber fractionation used in German mill Mar 118
Wastepaper market rebound to continue Jan 89
Wastepaper market recovery predicted Mar 132
Wastepaper outlook excellent per NARI Roundtable Oct 100

INDEX OF COMPANIES

This index includes both feature stories and news items.

—A—

ABITIBI-PRICE INC.

Domtar buys sawmill from firm Oct 35
Jonquiere mill sale closed Apr 25
Sault Ste. Marie sale delayed May 25
Starts up rebuilt Beaupre mill Jan 27
To sell Sault Ste. Marie mill Mar 29
Upgrades Pine Falls, Man., mill Apr 29

AMERICAN CAN CO.

Timberland sold to Gulf States Nov 35

AMERICAN STANDARD INC.

Sells Pioneer Business Forms Dec 35

APPLETON PAPERS INC.

Closes Glatfelter deal Nov 27
Plans Combined Locks upgrade Jan 29
Sale to B.A.T. upheld Feb 33
Third coater for Harrisburg Jun 29
To buy Glatfelter mill Aug 25

ASHUELOT PAPER CO. INC.

Acquires Putney Paper May 25

ATLANTIC PACKAGING PRODUCTS LTD.

Installs new preprint machine Dec 35

AUGUSTA NEWSPRINT CO.

Adds new power boiler Jun 116
Adds new woodyard Jul 119
New machine doubles capacity Apr 105

AUSTELL BOX BOARD CORP.

Installs new coal-fired boiler Jun 135

—B—

BOISE CASCADE CORP.

Aberdeen sawmill to stay closed Dec 37
Brattleboro contract ratified Nov 29
Buys North Anson plant Nov 35
Ends Boise Southern venture Jun 25
International Falls bargaining Jul 23
Introduces security papers line Aug 31
Mill fined for test-tampering Feb 39
Oregon operations to consolidate Oct 35
Reconfigures Salem plant Oct 137
Resumes Kenora mill upgrade Apr 27
Salem, Ore., finishing upgrade Jan 29
To buy U.S. Corrugated Box Nov 31
Vancouver upgrade planned May 33
Vermont hydropower project Oct 35

BOISE CASCADE CANADA LTD.

Dryer section for Fort Frances Aug 74
Repap to buy Newcastle mill Oct 23
Strainer recovers fiber at Kenora Jul 111

BOWATER CORP.

Spins off North American mills May 23

BOWATER INC.

Company created in spin-off May 23
Confirms new LWC machine Oct 23
Okays LWC machine Sep 39

BOWATER CAROLINA CO.

Reduces TRS emissions Apr 77

BOWATER MERSEY PAPER CO. LTD.

Rebuilds newsprint machines Nov 117

BOWATER NEWFOUNDLAND LTD.

Corner Brook bidder drops out Sep 29
No decision: Corner Brook buy Aug 25
Potential mill buyers withdraw Mar 31
Reviews Corner Brook proposals Jun 27
Successful bidder: Corner Brook Nov 23

Let us recondition your wearing surfaces.

Phillips Kiln Service Co., Inc. can recondition riding rings and carrying rollers on dryers, coolers, pelletizers, in place, and while the units are operating.

Production in your plant may be less efficient if riding rings and carrying rollers are pitted, spalled, and out-of-round. These conditions, if not corrected, can slow down or halt production.

Phillips patented* grinding process can smooth out your wearing surfaces with little or no downtime. Phillips skilled technicians recondition wearing surfaces in

place, usually while rotary equipment is in operation.

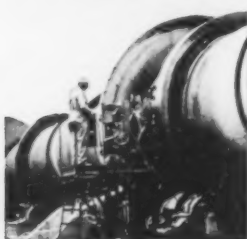

Our technicians correct those "problem cases" that result from out-of-round conditions, convex-concave wear, spalled and washboarded surfaces on riding rings and carrying rollers.

Your rotary equipment will operate more efficiently. You'll have less downtime, reduced energy demands and less maintenance.

Phillips also sleeves worn carrying rollers. We also buy, sell, trade and install new and used component parts and equipment such as riding rings, thrust rollers, chain drive systems, gears, pinions, graphite blocks and shell sections.

For more information or for an inspection visit, call toll free (800) 831-0876.

In Iowa, call (712) 255-0177.
